EXPERIENCE

Junior Web Developer
Emzee Lab Sdn. Bhd.
March 2023 – June 2023

- Developed a Products Display System that allows business users to add or modify products, enabling customers to view the products directly on the company website.

Web Developer and Webmaster
Malaysia Trains & Rail Enthusiasts (MTREC)
August 2022

- Developed a new crowdsourced train spotting system that was highly welcomed by the community, achieving over 99.999% reliability.
- Maintained, managed, and monitored server load to ensure optimal performance.
- Created Malaysia's first publicly available real-time train tracker map using the GTFS-R feed from DTSA, which garnered recognition from the Ministry of Transport Malaysia.
- Also maintained and updated the website and system, serving an average of 240,000 visitors per month, and successfully mitigated DDoS attacks to protect the websites and systems from vulnerability.

SKILLS

Technical Skills
Web System Development
